DECLARATION OF CONFORMITY

CTA TRASFORMATORI ELETTRICI srl, based in Moscazzano (CR) – Italy, Località Vignola 9, accepting the full responsibility, declares that the following transformers:

Dry transformers and auto-transformers, single-phase – power: up to 1KVA; three-phases – power up to 5KVA – Voltage: up to 36KV

Are conforming to the European norms CEI 96.13 concerning separation transformers.

Dry transformers ad auto-transformers, single-phase – power up to 1KVA; three-phases – power up to 5KVA – Voltage up to 36KVA

Are conforming to the European norms CEI 14.4 and CEI 14.8 concerning dry transformers.

These products are built according to the essential requirements of the European standard 72/23/CEE and 93/68/CEE concerning the electrical material that must be employed under certain voltage limits.

These components, that cannot be used separately but only assembled into other machines, are not included in the European standards 89/336/CEE and 92/31/CEE regarding electromagnetic compatibility.

Moscazzano, January 2004

DECLARATION OF CONFORMITY

CTA TRASFORMATORI ELETTRICI srl, based in Moscazzano (CR) – Italy, Località Vignola 9, accepting the full responsibility, declares that the following transformers:

- Safety transformers
Single-phase – power lower 10KVA
Three-phases – power lower 16KVA
Primary voltage lower 1000V and
Secondary voltage lower 50V

- Isolating transformers
Single-phase – power lower 25KVA
Three-phases – power lower 40KVA
Primary voltage lower 1000V and
Secondary voltage 500V

Are conforming to the European norms CEI-EN61558-1 61558-2-4 61558-2-6 concerning safety and isolating transformers.

These products are built according to the essential requirements of the European standard 2006/95/CEE concerning the safety of the electrical material that must be employed under certain voltage limits.

These components, that cannot be used separately but only assembled into other machines, are not included in the European standards 2004/108/CEE regarding electromagnetic compatibility.
